

INSTRUCTIONS FOR USING EMBEDDED ENGLISH AND TRANSLATION GLOSSARIES

August 28, 2019

Students who are English learners may benefit from using a Translation Glossary for Mathematics tests. These students should have the Translation Glossary option selected in TIDE for the appropriate language. See the Translation Glossaries section in the *Usability, Accessibility, and Accommodations Guidelines*, available on the AlohaHSAP.org and Smarter Balanced websites, for information on how to determine if this support is appropriate for particular students.

The following steps are designed to help Test Administrators and students access the correct embedded Translation Glossary designated support.

ACCESSING GLOSSARIES

The embedded Translation Glossary designated supports are available as language supports provided for selected construct-irrelevant terms for Mathematics tests only.

Students can be assigned:

Therefore, if a student has access to the English and one second-language glossary, some terms may have both glossaries present while other terms may have only one of the two glossaries present.

USING GLOSSARIES

When there is a term for which a glossary is available, there will be a faint gray dotted border around the term as shown inside the red box below.
